Instructions

Please use this file to document any testing of your website that you carried out. You are not expected to write a whole essay on this: two or three pages at most should suffice (including screenshots).

Examples

Example tasks you might carry out (you are expected to give a bit more detail, and be specific about what you have done):

Task 1. Cross-browser compatibility:

<u>On Internet Explorer and Firefox:</u>
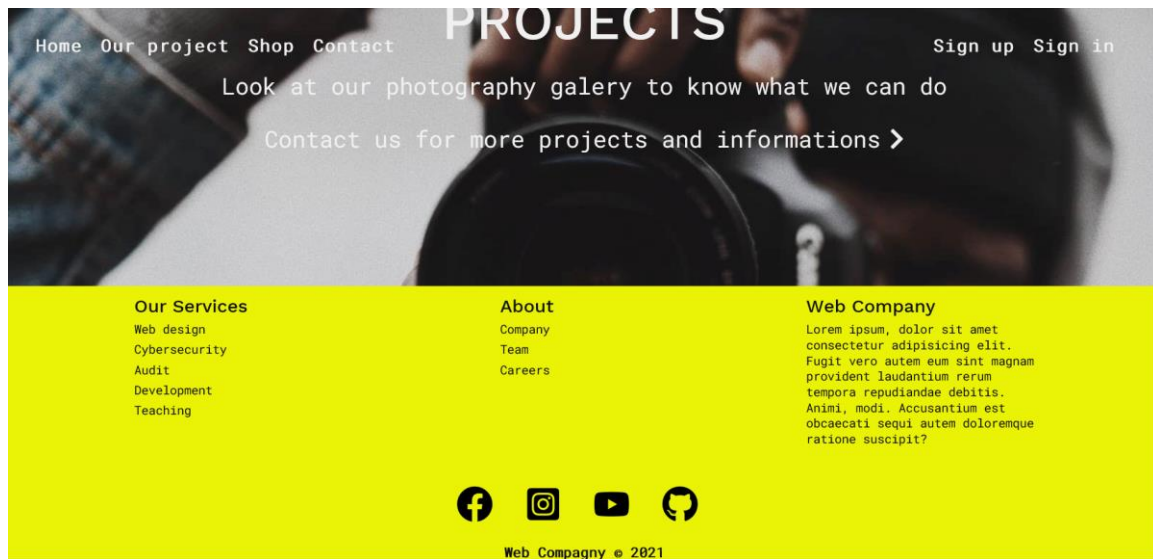

Home Our project Shop Contact   Sign up Sign in
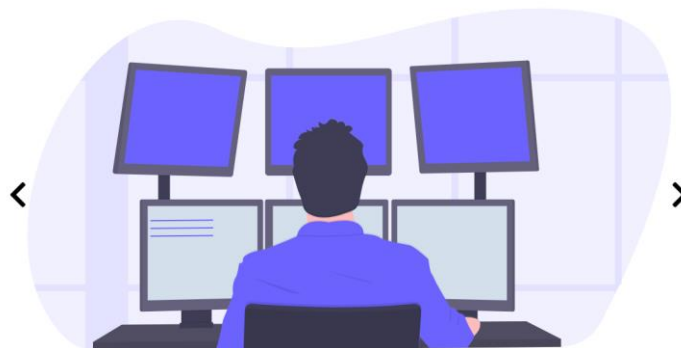

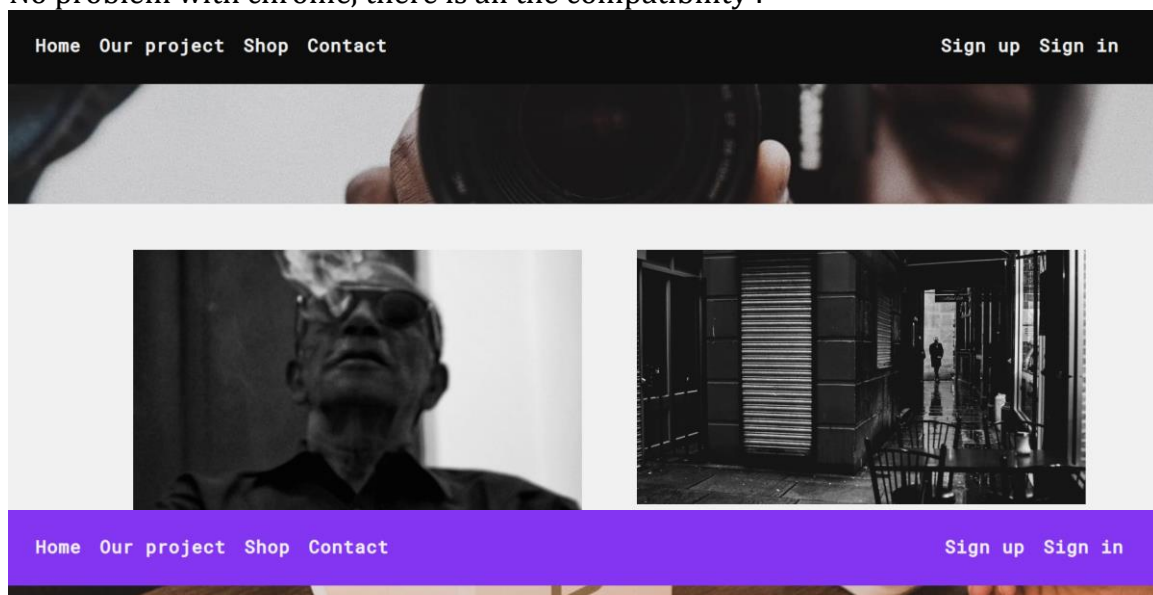

Take a look on our shop

No support of the svg files.

No support of the different js scripts. Need to use other libraries and IDE.

No problem with chrome, there is all the compatibility :

Task 2. HTML/CSS Validation

Same problem…

Task 3. Peer review (via screen share or remote control)

Some of my peers said that there some problems with the loading of the gallery and with other browser.
They said that the design is very good and fluid. The responsive is not too bad but need to be improve if we want to have a finished site. The choice of the colours is very good, and we are not loose in the different effects.
I wanted to add some transition between the pages if I really want to finish that.
They said that all can be improve and optimize to be for a real enterprise but that is not too bad for a begin.
Some of them said that I need to be careful with the text effects because it is easy to have enough of these and to be loosed in that.
